

# AUTOMOTIVE TECHNICIAN CERTIFIED

Automotive systems are more complex than ever and the demand for *qualified* technicians has never been greater. To work on new cars a technician must understand electronics, computers, specialized tools and software programs as well as engine mechanics.

The TMCC Automotive program trains technicians to fill the need for skilled workers throughout northern Nevada. Our **NATEF** certified program prepares students to complete the **ASE** certifications required for high wage careers at new car dealerships across the region.

## Scholarships Available

Generous donations by members of **Reno Sparks New Car Dealers Association** and the **Nevada New Car Franchise Dealers Association** have made *several* two-year scholarships available for students entering the TMCC Automotive Certified Technician program.

### Benefits

- ASE Certified Training
- Professional Instruction
- Internship Experience at Participating Dealerships
