

# DIESEL TECHNICIAN

## Heavy Equipment • Over-the-Road

---

TRAINING FOR HIGH-SKILL, HIGH-WAGE CAREERS AT TMCC

---

As Nevada's economy grows, so does the need for *qualified* technicians to maintain and repair the trucks and heavy equipment that keep business going.

### TRAINING TO FIT

With either the entry-level one-year Certificate of Achievement or the comprehensive AAS degree from TMCC, diesel technicians are well prepared to fill positions in a variety of industries, including long-haul trucking, mass transit, warehousing, mining, and construction.

Using sophisticated equipment in a modern shop, students maintain, troubleshoot, and repair diesel components, from individual parts to entire systems. We combines classroom demonstrations with hands-on projects for a realistic learning experience.

### BUMPER TO BUMPER

The TMCC Diesel Technician is thorough, covering all components of diesel equipment:

- Diesel engines
- Transmissions
- Drive trains
- Differentials
- Hydraulics
- Brake systems
- Electrical systems
- Electronic fuel injection systems
- HVAC and refrigeration
- Light-duty diesel
- Heavy duty trailers
